Methodology

Composite risk score combines four dimensions: (1) attrition rate vs the enterprise average, (2) attrition year-over-year change, (3) engagement score level and trend, (4) hiring shortfall when attrition is rising, (5) compensation engagement dimension. Each driver contributes 1-3 points to a combined score. Severity bands: Critical ≥ 9 , High ≥ 6 , Medium ≥ 3 , Low ≥ 1 . Findings are produced at both the LOB+Region and LOB+Region+City grain to surface localized hotspots that aggregate up. Reproducible from the source CSVs in the accompanying detail workbook.
